

FIRST® Robotics Competition - Week 4

Week 4: Snowstorm

Due to a snowstorm we missed a day this week, but we'll be picking up the slack with an extra meeting next week. We're also beginning to think of robot names in preparation for competition. We're making great progress, progressing in manufacturing and moving on from prototypes.

Ice Cream for Breakfast!

February 5th is National Ice Cream for Breakfast day, and the team enjoyed ice cream sandwiches and shortcake bars this Saturday morning. After a break due to a snow day, everyone is nice and refreshed to get back to work.

What did each sub-system accomplish?

Business: Worked on Woodie Flowers nomination essay and hosted Ice Cream for Breakfast day

Media: Tested the drone and continued to document the season

Drive Chassis: Finished chassis

Shooter & Intake System: Finished prototype and final CAD, begun manufacturing final parts

Climber: Began assembling final parts, machining hooks

Vision: Refined algorithm and integrated demo using another chassis

Field Parts: Finished assembling the field!
